Weight	16 lb
53' Trailer Quantity	1,612
Dynamic Load Capacity	2,400 lb**
Static Load Capacity	30,000 lb**

*Inside dimensions and inside volume to fill line with no top cap.

**As all products can have unique loading patterns and shifting characteristics, PVpallet recommends that customers perform their own load capacity testing. PVpallet's standard is to target and test to the maximum weight limits as shown here. PVpallet does not warrant that all loads will perform the same as lab testing.

PVpallet warrants its containers for a period of one year from date of shipment. If within such period a container is proven to be defective due to manufacturing defects, the product will be repaired or replaced. This warranty does not include damage due to normal material handling (e.g. forklift damage, etc.). Customer is responsible for all freight charges.
